DEMOCRATIC DESTRUCTIVENESS

WAR policies of the administration are beginning to hear fruit in the destruction of industries built up through earnest per sonal application throughout the parlous days of war. With the one thought of deferring the day of judgment and postponing a one big whole all accounts settlement of grave issues the Democratic party has brought about the strends of the for of Ladause a panicky condition such as is always founded on good intentioned this decired into without quick action. Investors have been informed from time to both had keen a see that time that the administration would take care of the country but, whose Zerstenk is the total up to date, there has not been any sign or evidence of performance day in the series The latest application of this policy is found in the youngest by the man have dustry in Nye county which is threatened with extinction through with some influential than a new and an American soldier, cheerfully the free trade policy of the Democratic party. This is the clay and an automorphism core have primary paint development which has been going along in the home and he office and at him southern end of Nye county almost without attracting any attention except from the assessor and tax collector. The business has great future that can be developed only, like other infinit inclustries | queues formed at the two by a protection policy that would exclude foreign products from competing with the American product.

Down on the borders of Death Valley there has been built up an industry that added thousands of dollars to the valuation of Searching for Burial property in Nye county by placing on the assessment rolls 1200 acres of land redeemed from the grey desert and made to render tribute to the hand of industry. This area represents locations made by the Bradfords, who, at great personal sacrifice, have developed what is admitted to be the largest tennage of calcium carbonate known to exist on the American continent. The market is the Assertment Press. in San Francisco where it furnishes the motive for several extensive paint plants whose owners say the quality cannot be surpassed as a chemical analysis gives a purity of 98 per cent. The owners of this deposit are poor men who have steadily expanded their bust had spot of the thorough the interness from a first shipment of one carload a month to the point Spanned was sensed the Carlo where they were about to sign contracts with one firm for 500 tons a month. Before the transaction was consummated word was Maner sland, the gen erts of J. F. received that a steamship loaded with whiting would arrive in San Moore a weathy perident of thoral Francisco bay within a month. The cost of the British whiting With a party of friends Mr. Many delivered at the works in Berkeley is \$6 less than the cost of less leven chirdren the and of Sa delivering the Nevada product at the same point. The difference is Misual for source days due to the fact that the British steamship carries her cargo 6000 miles as ballast with the assurance of a high priced charter for always without success the return voyage. The United States is made the dumping ground. Cabrillo deal on one of the of creation and, unless congress acts, the country will be treated appears to the spectacle of other industries crushed by this relentless

Moloch of free trade The only hope of preservation is the coming of a Republicamajority in both houses although the fact that President Wilson and his backers are all of free trade tendencies will have a dis couraging effect on any efforts of the new majority to help the struggling Nye county industries.

FEDERAL INTERFERENCE

S ECRETARY LANE is becoming as virulent a pest as Post (PHEYENNE Wire, March 16 of addition to hearty consummer with the normal activities of telegraph and telephone companies until a half federal agencies in relationaria was called by several state commissions backed by state courts, work. Wyoming will offer commis-Lane is cultivating every opportunity of fattening his average with the politicians. His latest effort has been a piece of importment ing that the Truckee-Carson reclamation project should be known hereafter as the "Newlands project." This is a direct diffront : the settlers who stuck to the project through the stormy day pioneering when they vainly petitioned Senator Newlands urging relief measures that would spare them from having their holdingconfiscated through operation of an odious system of penalties and exactions which were erowding the settler to the wall. Newlands paid no attention to these memorials than if they had been so much waste paper and, the few survivors of those trying times. have no kind feeling for the man who is proclaimed as the fatherof this badly managed enterprise. The sentiment was shown two weeks ago when a movement to confer the title of "Newlands" on the project was defeated by an almost unanimous vote in the Nevada legislature. The men and women of Churchill county are the ones at whose instigation the act was done. They had suffered long enough from the acts of Newlands and they saw no reason why their project should be used as a monument for the man who used Nevada simply for a stepping stone to the senate. Secretary Lane could not have been blind to what was going on in connection with this movement and it seems like a direct slap in the face to have a federal officer to go out of his official duties to arouse the resentment of a long and patiently suffering people

Anything that will help Reno is all right in the eyes of the papers of that town which are unanimous in support of the racing commission bill while opposed to the bill providing for boxing contests. The trouble is that Reno is not broad enough to enter into the spirit of the game as played by the rest of the state. It must be all for Reno or the people of that city cannot see any reason for helping along other sections. If Reno citizens were not such a narrow minded pigheaded lot they would be first to realize that anything which benefits the state must necessarily benefit that city. Probably there is not another community of pinheads in the union to which President Wilson's description applies so aptly when he said their shoulders were surmounted by a knot to keep their bodies from unraveling.

Workingmen should steer clear of Reno for, if they catch you with a smell of spirits on your breath it is you for the hoosegow

or the payment of a fine of \$100. Befor go to Trueline and spenyour time and money where you will not be confronted by an exeofficer anxious to make a case, and a justice of the peace who onducted a saloss for forty years and also flors the camer \$100
